

Appeal to the International Criminal Court (ICC)

Not to fulfil Paris Agreement (PA) as well as massively acting against it – specially by expanding fossil fuel production - by persons, who are obliged to fulfil PA, and/or organized groups of these offenders is global genocide against whole mankind by 'joint criminal enterprise'.

To allow, instigate, order, plan, commit, execute, aid and/or abet the industrial destruction of the Brazilian rainforest as global carbon sinks is genocide against indigenous peoples in Brazil as well as global genocide by 'joint criminal enterprise'.

Climate Scientists fear the collapse of the Brazilian rain forest already by 2021.

Therefore mankind is existentially threatened by a man-made ecological and climatological Super-MCA.

As a consequence we call the ICC to most immediately

1. start official investigations against the supposed culprits because of global genocide (Art.6 (c) Rome Statute) and crime against humanity (Art. 7 para.1 (b) Rome Statute)
2. order provisional protection measurements according to Art. 68 Rome Statute to protect the Brazilian indigenous people, the Brazilian rainforest as global carbon sink, global climate and whole mankind
3. build an "International ICC-Task-Force against Global Genocide" as well as a special "International ICC-Task-Force against Industrial Destruction of Rain Forests"
