**Re.: Convene Emergency Special Session  
for Saving our World**

*Dear UN Secretary-General António Guterres,*

*Thank you for your work and involvement in the fight against climate change.  
We appreciate your efforts and pay respect in protecting our future generations.*

*We all sit in the same boat and the waves are really high these days, but together we will  
make it through - also thanks to your work.*

*Now we have another storm coming: **There is the most threatening danger of three man  
made climate collapse tipping points to occur in this very year 2020.***

*The tropical rainforest is about to collapse*

*<https://www.nytimes.com/2019/08/30/world/americas/amazon-rainforest-fires-climate.html>*

*and living space for uncountable amounts of lives are in danger, and 2020 is the very last  
year to massively reduce carbon emissions, if mankind should survive. Our boat threatens to  
sink again. We need your help to plug the hole and keep on sailing.*

*We ask you to convene a special emergency meeting of the UNGA General Assembly (as a conference call) to decide on drastic emergency measures against the acute impending entry of three man-made (!) climate tipping points.*

*We kindly ask you to get in contact with the UN Member States to convene an emergency special session to discuss our question of request. COP26 has been canceled - this is our last chance to maneuver our boat into the right direction before the threatening waves come crashing into us. As the Fridays For Future Movement we are our scientists' mouthpiece and together we unite in the name of a better future.*

*Our subject is very serious and real as we are in danger of extinction of mankind. To make our points clear, we have written in cooperation with Gisela Toussaint, attorney at law from Germany, a draft emergency resolution with our crucial key points for you to consider to decide to convoke the emergency special session.*

### **Emergency Resolution to most effectively counteract man made Three Climate Collapse Tipping Points in 2020 as well as man made Global Genocide**

1. To safeguard humankind to the most effective degree, the acts, committed by leaders of governments, industry, investment funds or any legal entity, of massively ignoring, boycotting or contravening the UN Paris Agreement and its measures - specially to safe carbon sinks, to decarbonize and to transition the global economy to the use of renewable energy sources as soon as humanly possible - are seen and will be charged as acts of global Genocide and/or a global Crime against humanity.

2. Especially because of the most current danger of meeting the **(1.) Global Tipping Point** of collapse of the evapotranspiration system of the Amazon rainforest already in 2020 with high danger of collapse of global climate:

- to cut, burn or anyhow else deforest any further territory of the Amazon rainforest or any other rainforest - except in a sustainable way - has been and is strictly forbidden from now on as being a massive breach of UN Paris Agreement as well as global genocide.

3. Specially because of the current danger of deciding the Brazilian proposed law 191 – which allows the conversion of rain forest land into industrial land - being approved in 2020 and the danger of the forest – a global carbon sink with high danger of collapse of global climate – very soon reaching the **(2.) Global Tipping Point** of destruction of:

- to transfer (and to decide to transfer) rain forest land into private, farm, mining, oil drilling, building, infrastructure land or any other form of industrial land has been and is strictly forbidden from now on as being a massive breach of UN Paris Agreement as well as global genocide.

4. Specially because of the increasing massive attacks against indigenous peoples in Brazil:

- to destroy rainforest land which serves as home for the indigenous peoples and/or to threaten, terrorize, evict and/or kill members of indigenous peoples has been and is strictly forbidden from now on as being committing genocide against them.

5. Specially because of the extremely high danger of missing the absolute essential global survival goal to massively reduce carbon emissions latest (!) in 2020 according to the 2020 Carbon Crunch Curve, which is the **(3.) Global Tipping Point**:

- to approve, construct and/or start any further oil, coal and/or gas production, transport and/or processing facility has been and is strictly forbidden from now on as being a massive breach of UN Paris Agreement as well as global genocide.

6. Specially because of the extremely high danger of missing the absolute essential global survival goal to massively reduce carbon emissions latest (!) in 2020 according to the 2020 Carbon Crunch Curve, which is the **(3.) Global Tipping Point**:

- to pay subsidies or invest into oil, coal and/or gas production, transport and/or processing facilities has been and is strictly forbidden from now on as massive breach of UN Paris Agreement as well as global genocide.
- the immense money which no longer will be used as fossil subsidies will at once be invested as subsidies for private renewable projects and as state investments for public renewable energy projects.

7. All leaders of governments, industry, investment funds or any legal entity, who are responsible to fulfil the Paris Agreement, are once more and very most urgently called to stop the “Climate Collapse Triple Tipping Point Year 2020“ and immediately act according to UN Paris Agreement specially according to the above global emergency rulings of the UNGA to stop and avoid current global genocide.

8. The ICC as the UN institution with the most effective power to stop and punish individuals who commit ultimate criminal acts against single peoples and even all peoples as whole mankind, is as well called to realize the “Climate Collapse Triple Tipping Point Year 2020“ and to actively avoid further global genocide by immediately:

- a) starting investigations against those responsible mentioned above whom ignore the “Climate Collapse Triple Tipping Point Year 2020“ and have not and/or do not act according to UN Paris Agreement and/or even act massively against it (specially as in the above most forbidden cases) and so commit global genocide.
- b) order immediate provisional protection measurements according to Art. 68 Rome Statute to most effectively protect mankind and
- c) build an “ICC Task-Force against industrial destruction of rainforests” and an “ICC Task-Force against Global Genocide”.

*Time is running out for strong measurements to avoid the three climate collapse tipping points this year. So we kindly ask you to get in contact with the UNGA Members to ask them to convene an emergency special session on this most urgent issue.*

*Thank you very much.*

*Yours, sincerely*

*Elias Pfeffer*
