

**The UN General Assembly  
in its 11th emergency special session  
facing the  
„Climate Collapse Triple Tipping Point Year 2020“  
decides  
the following  
Global Emergency Resolution\*  
against  
Global Genocide**

1. To safeguard humankind to the most effective degree, the acts, committed by leaders of governments, industry, investment funds or any legal entity, of massively ignoring, boycotting or contravening the UN Paris Agreement and its measures specially to safe carbon sinks, to decarbonize and to transition the global economy to the use of renewable energy sources as soon as humanly possible, is seen and will be charged as acts of global Genocide and/or a global Crime against Humanity
2. Specially because of the most currant danger of meeting the (1.) Global Tipping Point of collapse of the evapotranspiration system of the Amazon rain forest allready in 2020 with high danger of collapse of global climate:
  - to cut, burn or anyhow else destroy any further tree of the Amazon rain forest or any other rain forest has been and is strictly forbidden from now on as beeing a massive breach of UN Paris Agreement as well as global genocide

3. Specially because of the most currant danger of deciding the Brazilian proposed law 191 to allow to convert rain forest land into industrial land in 2020 and so very soon reach the (2.) Global Tipping Point of destruction of a global carbon sink with high danger of collapse of global climate:

- to transfer (and to decide to transfere) rain forest land into private, farm, mining, oil drilling, building, infrastructure land or any other form of industrial land has been and is strictly forbidden from now on as beeing a massive breach of UN Paris Agreement as well as global genocide

4. Specially because of increasing massive attacks against indigenous peoples in Brazil:

- to destroy rain forest land as home of indigenous peoples and/or to threaten, terrorize, evict and/or kill members of indigenous peoples has been and is strictly forbidden from now on as beeing committing genocide against them

5. Specially because of the extremely high danger of missing the absolute essential global survival goal to massively reduce carbon emissions latest (!) in 2020 according to the 2020 Carbon Crunch Curve, which is the (3.) Global Tipping Point:

## CARBON CRUNCH

There is a mean budget of around 600 gigatonnes (Gt) of carbon dioxide left to emit before the planet warms dangerously, by more than 1.5–2°C. Stretching the budget to 800 Gt buys another 10 years, but at a greater risk of exceeding the temperature limit.

- to approve, construct and/or start any further oil, coal and/or gas production, transport and/or processing facility has been and is strictly forbidden from now on as being a massive breach of UN Paris Agreement as well as global genocide

6. Specially because of the extremely high danger of missing the absolute essential global survival goal to massively reduce carbon emissions latest (!) in 2020 according to the 2020 Carbon Crunch Curve, which is the (3.) Global Tipping Point:

- to pay subsidies or invest into oil, coal and/or gas production, transport and/or processing facilities has been and is strictly forbidden from now on as massive breach of UN Paris Agreement as well as global genocide

7. All leaders of governments, industry, investment funds or any legal entity, who are responsible to fulfil the Paris Agreement, are once more and very most urgently called to realize the „Climate Collapse Tripple Tipping Point Year 2020“ and immediately act according to UN Paris Agreement specially according to the above global emergency rulings of the UNGA to stop and avoid current global genocide
  
8. The ICC as the UN institution with the most effective power to stop and punish individuals, who commit ultimate criminal acts against single peoples and even all peoples as whole mankind, is as well called to realize the „Climate Collapse Tripple Tipping Point Year 2020“ and to actively avoid further global genocide by immediately
  - a) start investigations against those responsables mentioned above who ignore the „Climate Collapse Tripple Tipping Point Year 2020“ and have not and/or do not act according to UN Paris Agreement and/or even act massively against it (specially as in the above most forbidden cases) and so commit global genocide
  
  - b) order immediate provisional protection measurements according to Art. 68 Rome Statute to most effectively protect mankind and
  
  - c) build an “ICC Task-Force against industrial destruction of rain forests” and an “ICC Task-Force against Global Genocide”
