

The UN General Assembly

for a most effective protection of global mankind

judges that

massively boycotting, ignoring or acting against the

UN Climate Agreement of Paris

and its rules to decarbonize and to change industry

to renewable energy as soon as possible

by leaders of governments, industry or investment funds

would be seen and charged as committing

global genocide

and/or global crime against humanity*

***Planned UN Declaration on the 72nd UN General Assembly in New York, starting 12th of September 2017**
