K 26.4.2017

Charge of Crime of planned global Genocide and Crime against Humanity by officially and massively acting against the UN Climate Agreement of Paris and so (co-) causing irreversible global Climate Crash and Genocide.

Australian Declaration of War against all Nations.

Accused:

- 1. Malcom Turnbull, Prime Minister of Australia, Canberra, Australia**
- 2. Gautam Adani, Chairman of Adani Group, Ahmedabad, India**

Committed:

Accused Nr. 1 as Prime Minister of Australia by

- a) Willful deceiting the Australian and international public by claiming the existence of a national energy crisis and danger of lights going out (March 2017)
- b) Visiting Gautam Adani, accused Nr.2, in India in summer 2017 to officially support his plan to start one of the biggest coal mines on earth, the Carmichael Mine near Abbot Point/Great Barrier Reef in Queensland, Australia
- c) Declaring a national plan of “National Energy Guaranty” by turning back to coal and gas and allow as well as order energy suppliers to use even more coal and gas (17.10.2017)

- d) Stopping the official plan of the chief scientist Alan Finkel to regulate Australian energy suppliers by the order to include a special rate of sustainable energy, starting 2020.
- e) Cutting all state subsidies for emission free forms of energy as sun and wind to zero, starting 2020.
- f) Stopping emission trade
- g) Stopping prizing CO2
- h) Stopping the Labor Party's plan of a national goal of 50% renewable energy until 2050
- i) Destroying the new industrial sector of renewable energy suppliers by cutting their state subsidies to zero
- j) Trying to pay highest subsidies to the accused Nr.2 through a national infrastructure fund to finance for free the costs of building a railway between the planned Carmichael Mine and the harbor Abbot Point to mass transport the coal through the Great Barrier Reef
- k) Bringing in great danger and destroy the Great Barrier Reef by that
- l) Supporting the accused Nr. 2 to extract billions of tons of coal to be sold and will emit billions of tons of CO2, knowing that more than 2/3 of the known coal gas and oil reserves have to stay in the ground to assure that the global 2-degree-goal will be achieved
- m) Knowing that because of l) no more new and especially no extremely big coal mines are allowed to be started
- n) Not stopping the massive climate disastrous Carmichael Mine project by referring to his highly serious duties out of the UN Climate Agreement of Paris
- o) Acting as Prime Minister of Australia massively against the global decision for ambitious decarbonisation of each national energy industry by the UN Climate Agreement of Paris to avoid soon destruction of global mankind
- p) Acting massively against the UN Climate Agreement though knowing that in exact opposite only ambitiously fulfilling the Agreement will avoid the soon destruction of global mankind
- q) Acting though clearly knowing that first of all the Prime Ministers of all nations are quoted by the UN Climate Agreement of Paris to take ambitious action to save mankind

- r) Acting though knowing that such a massive increasing of carbonization in Australia will make the efforts of all other nations to ambitiously decarbonize totally inefficient and in vain,
- s) Announcing the massive increasing of carbonization in Australia is in all consequences a declaration of war against all nations
- t) Acting willingly and massively against the duty of the UN Climate Agreement of Paris and so willingly committing global genocide and crime against global mankind

Accused Nr. 2 as Chairman of Adani Group by

- a) Planning and starting to realize the new Carmichael Mine as one of the biggest coal mines on earth near Abbot Point/Great Barrier Reef in Queensland, Australia
- b) Planning to extract billions of tons of coal to be sold and will emit billions of tons of CO₂, knowing that more than 2/3 of the known coal gas and oil reserves have to stay in the ground to assure that the global 2-degree-goal will be achieved
- c) Knowing that because of b) no more new and especially no extremely big coal mines are allowed to be started
- d) Ignoring many investors and banks true arguments not to invest in the Carmichael Mine because of massively aggravate climate change to climate collapse
- e) Trying to get national subsidies out of the Australian Infrastructure Fund to finance for free the costs to build a railway line from Carmichael Mine to the harbor Abbot Point
- f) Risking the collapse and destruction of the Great Barrier Reef by mass transporting the coal from Abbot Point along and through the Great Barrier Reef
- g) Knowing the clear duty of all national and global energy industry to very soon decarbonize their industry as it is declared in the UN Climate Agreement of Paris to avoid the destruction of global mankind
- h) Willingly acting against the duty of the UN Climate Agreement of Paris and so committing global genocide and crime against global mankind

To give evidence to all these accused and intended actions please check the detailed reportages of Asia Pacific Economic Correspondent Dr. Christoph Hein in his article in the Frankfurter Allgemeine Zeitung of 18.10.2017 “Australien will Kohle in den Mittelpunkt rücken” as well as the reportage of the Asia Pacific Political Correspondent Till Fähnders

in his article in the Frankfurter Allgemeine Zeitung of 30.10.2017 “Die Schatten des Rohstoffbooms². These two articles are enclosed to this charge of crime.

Referring to my earlier charges of crime of global genocide and crime of global humanity, which I sent to you, now there is even more clear evidence about the international public knowledge of the fact that massively acting against the UN Climate Agreement of Paris causes the destruction of global mankind and so clearly is committing global genocide.

The most prominent statement about this causally connection just has been made on 25.10.2017 by the Chief of IMF, Christine Lagarde, at the international future conference in Riad, Saudi Arabia.

She said - on open stage - to the sheiks:

“If we don’t do anything about climate change now in 50 years time we all will be toasted, roasted and grilled!”

She said “we all will be toasted...” ‘We all’ means not only some inhabitants of islands anywhere within the oceans but the whole mankind!

And if people are toasted, roasted and grilled they without any doubt do die!

Mrs. Lagarde chose a quite impressive, bizarre and unforgettable picture to shake everybody’s mind and point out that everybody on earth will die if we do not fulfill the UN Climate Agreement as soon as possible.

Her absolute epochal speech is to be seen on YouTube.

She continued her speech:

“So decisions are needed at this point of time”

I quote this extra statement of Mrs. Lagarde to make an appeal as well to the ICC itself:

At this point of time decisions as well of the ICC are needed to make an international declaration that massively acting against the UN Climate Agreement is willingly committing global genocide and crime against global mankind.

So at this point of time the decision of the ICC is needed to start official genocide investigations against prime ministers, investors, chairmen of fossil energy groups and others who massively act against the UN Climate Agreement of Paris.

As now not only Mrs. Lagarde as chief of IMF but as well the board member of the Deutsche Bundesbank, Dr. Andreas Dombret, makes official statements about the massive danger of climate change, the ICC should no longer hesitate to start action.

Mr. Dombret points out that to achieve the 2-Degree-Goal of the UN Climate Agreement of Paris, 2/3 of the known coal, oil and gas reservoirs have to be led in the ground and intensive action is needed in energy sectors as well as in all other sectors to achieve effective decarbonisation for global survival.

He already sees the beginning of a global economic change to a green economy which is caused and needed to fulfill the UN Climate Agreement of Paris.

Please see the article about the speech of Mr. Dombret at the National University of Singapore by Dr. Christoph Hein in the Frankfurter Allgemeinen Zeitung on 4.10.2017, which is enclosed.

At the end I want to once more ask the ICC to initiate and support the following

UN Declaration

**The UN General Assembly
for the most effective protection of mankind
judges that
massively boycotting, ignoring or acting against the
UN Climate Agreement of Paris
and its rules to decarbonize and to change industry to renewable energy
as soon as possible
by leaders of governments, industry and/or investment funds
would be seen and charged as
committing global genocide and/or global crime against humanity**

The text of this declaration could as well be taken as blueprint for a public statement of the ICC about committing global genocide by massively acting against the UN Climate Agreement of Paris.

And this future UN Declaration should not stop the ICC to start action now!

Thank you so much.

Yours sincerely
